

HOTSPOT LENDING

T-Mobile Hotspots

The Hollidaysburg Area Public Library is partnering with T-Mobile to offer mobile hotspots to our patrons for a nominal fee. The Library hotspot program allows library cardholders, who are in good standing, to access unlimited, high-speed Internet service anywhere a T-Mobile LTE service signal can be reached.

Eligibility

Adult patrons, age eighteen or older, who are in good standing with no outstanding fines are eligible to check out the mobile hotspots. The Library reserves the right to refuse check out privileges for this device for any patron for any reason.

Cost- \$15 for 14 Days

The mobile hotspots are available to check out for a nonrefundable fee of \$15.00 due upon check out of the device. The loan period for the mobile hotspot is fourteen days. The hotspots cannot be renewed, but can be checked out again after return and payment of another \$15.00 fee as long as a wait for the devices does not exist. A late fee of \$1.00 a day will be applied to the patron account if the device is overdue and Internet service will discontinue 24 hours after the device becomes overdue. After two weeks overdue, or if the device or any of its component pieces, including the box, charging cord, and manual is lost or damaged, a \$75.00 charge will be applied to the patron's account along with a \$5.00 processing fee.

Usage

The Hollidaysburg Area Public Library is not responsible for the Internet's content, and data collected or transmitted via the hotspot, or for any misuse of copyrighted material, pirating, or any other violation of law. The Library reserves the right to bar patrons from using the library if they have been found to be using the hotspot for criminal activity. The Library is not responsible for any damage by malicious software, identity theft, or other criminal activity that may result from

the Internet connection via the hotspot. Internet content filtering is not provided. Parents and guardians are responsible for a child's use of the hotspot and the material accessed.

The Library is not responsible for determining service quality or signal strength in the area the device is expected to be used, nor is the Library responsible for service quality or strength provided by T-Mobile. A service map can be accessed via the [T-Mobile website](#). If all hotspots are checked out a patron's name can be placed on a waiting list until one becomes available.
